

About GiftQuest:

GiftQuest is a computer based motivational gift discovery and application resource. This resource is being used in a great diversity of local churches, cell groups; colleges; counseling services; mission preparation programs as well as in countries around the world. It was designed for personal use as well as is the resource of choice for small to large local church applications.

GiftQuest is the work of two pastors who have advanced degrees and wanted to utilize test and measurement theory in the construct of a computer driven Motivational Spiritual Gift discovery and application resource. The use of the GiftQuest inventory design calls for and benefits from the utilization of the computer to help people accurately discover their spiritual motivational gifts. The personal report generated by the computer software contains a graphic display of a personal profile, a unique verbal description of motivational gifts, a personalized ranking (sorting) of the 150 common local church ministries (based on the specific gift mix of the person), a personalized ranking (sorting) of the 250 common secular vocations (based on the specific gift mix) and an extensive description of the characteristics of the significant motivations of the individual profiled.

The software package contains 18 copies of the paper GiftQuest inventory form that people- respondents fill in, the computer program CD, and an PDF formatted copy (on the CD) of our current computer manual and a copy of our Spiritual Gift Seminar. The complete software package costs \$89.00 plus \$7.50 for shipping and handling (US funds). We have made GiftQuest affordable for any size congregation.

Purchasers may photocopy the supplied inventories as many times as required by purchasers needs. In addition the program CD contains a Microsoft Word format copy of the GiftQuest Inventory so that you may make as many copies of the inventory as desired through Microsoft Word or something that reads Microsoft Word documents.

There is a 30-day money back guarantee and a one-year product support. The program runs on IBM clone machines running Windows 95 or higher, including Windows XP. We know that GiftQuest is also running on "Virtual PC" on a MAC.

GiftQuest is the only known spiritual gift software application that enables congregation reports. All of the records (people) in the database can be ranked (sorted) for any of the 7 fundamental motivational gifts, any of the 150 local church ministries and any of the 250 secular vocations. For example, you may wish to look for administrators in your

congregation. The entire database can be ranked (sorted) on the basis of the motivational gift of Administration. A list printable to the screen, a file or a printer will be instantly generated that ranks all the records for the gift of Administration.

GiftQuest is an invaluable personal and congregation resource. If you desire an accurate determination of the spiritual motivational gifts for individual and congregation discovery as well as relevant practical application, GiftQuest is the resource of choice.

How GiftQuest Works:

The GiftQuest resource has two basic parts. The first being the GiftQuest Inventory. Each person taking GiftQuest fills in a GiftQuest Discovering Your Motivating Spiritual Gift Inventory. This Inventory was designed utilizing test and measurement principles. The amount of time it takes for persons responding to these questions varies from person to person. Typically, there are some who can easily complete the questionnaire in less than 15 minutes. Typically, there are some who need several hours to carefully respond to each question. The average time is about 30 minutes to complete the inventory. The 160 questions are divided into groups of four questions and the respondent is asked to select the one of each set of four that is most like them. The respondent then selects the one of the remaining three that is least like them.

Upon completion of the Inventory, the responses are entered into the GiftQuest software for scoring, interpretation and report generation. It typically takes five minutes for the first time one inputs the responses found on the GiftQuest Inventory. After entering several, this can be done in about three (3) minutes. The software is set up identical to the Inventory form for ease of data entry. Once entered, the responses are saved in the GiftQuest database.

GiftQuest offers four different kinds of individual-personal reports that can be generated and printed. The most common report is the "complete report" which includes a graphic display of the unique motivating gifts profile, an extensive personal description based on gifts and intensities, a personalized motivational gift based ranking of the 150 local church ministries and printing of the top 15 percent, a personalized motivational gift based ranking of the 250 secular vocations and printing of the top 15 percent and an extensive description of each of those motivational gifts profiled as significant for the respondent.

GiftQuest is unique in that it offers nearly 400 different kinds of "congregation" or corporate reports. All of the records (people) in the

database may be ranked-sorted for any one or combination of the motivating gifts, any one of the local church ministries or any one of the 250 secular vocations. This congregation ranking can then be printed to the computer screen, a printer or a text file. This is an extremely practical and valuable feature that sets GiftQuest apart from all other known spiritual gift resources. As an example, a church may be looking for mercy motivated persons to staff their Mercy Ministries. The entire church congregation can be ordered-ranked on the basis of the single motivating gift of Mercy. A descending listing of Mercy motivated persons is generated by the program and the listing is available to the screen, printer and/or a word processor.

In our commitment to make GiftQuest affordable for any sized congregation, GiftQuest grants the right to photocopy the inventory to acquire additional copies. In addition, the GiftQuest CD has a Microsoft Word document file of the GiftQuest Inventory. Owners of the software may print as many copies of the inventory, using either this document file or photocopies of the Inventory, as desired.

Check the download section of this web site to obtain a free copy of a GiftQuest report as a sample and or a complete copy of the GiftQuest Inventory.
